

Capability Statement

Version 1.0 | Published: 06 July 2026 | Review date: July 2027

Company	DEVA Maintenance Services LTD
Purpose	A concise overview of engineering capability, contractor suitability and client support services
Scope	Industrial, commercial, manufacturing and production engineering support
Main contact	Daryl Gibson, Director DEVAMaintenance@outlook.com +44 (0) 7769 298893

1. Business overview

DEVA Maintenance Services LTD provides specialist engineering and maintenance support for industrial, commercial, manufacturing and production environments. The business is focused on practical engineering outcomes: keeping production running, reducing downtime, improving equipment reliability and supporting safer, better organised maintenance systems.

The company works as a flexible engineering support partner for sites that need hands-on mechanical and electrical maintenance capability, short-term labour support, planned maintenance structure, condition monitoring, continuous improvement and OEE-focused support.

Built around uptime, reliability and practical problem solving - not unnecessary complexity.

2. Core services

Service area	Typical client value
Preventative & reactive maintenance	Breakdown response, planned maintenance support, practical fault correction and equipment reliability improvements.
Condition monitoring & remedial works	Early identification of developing faults including vibration, wear, misalignment, overheating, air leaks and lubrication issues.
PPM creation & implementation	Creation of structured maintenance routines that are realistic, followed, documented and useful to production sites.
Skilled labour supply	Experienced engineering support for shift cover, shutdown work, project support and short-term maintenance gaps.
Continuous improvement projects	Practical engineering changes to reduce downtime, repeat faults, waste, changeover losses and avoidable production disruption.

Service area	Typical client value
OEE specialist services	Linking production performance losses to engineering actions that improve availability, performance and quality.

3. Industries and environments supported

- Manufacturing and production facilities
- Paint, coatings and chemical manufacturing environments
- Furniture manufacturing and assembly line operations
- Agricultural production and processing equipment
- Commercial and industrial sites, plant rooms and site infrastructure
- Conveyors, packaging equipment, material handling and general production machinery
- Heavy plant, steel, cement and industrial processing environments
- Shutdowns, planned works, installations, remedial works and maintenance improvement projects

4. Why clients use DEVA Maintenance

Client need	DEVA Maintenance response
Reduce downtime	Hands-on fault finding, repeat fault elimination and practical maintenance support focused on keeping production running.
Improve reliability	PPM routines, condition checks, remedial action plans and engineering follow-up that reduce avoidable failures.
Fill skills gaps	Flexible skilled engineering support for projects, planned works, short-term cover and shutdown tasks.
Improve maintenance organisation	Asset registers, PPM schedules, checklists, defect logs, action trackers and practical handover documentation.
Support production performance	OEE review, downtime analysis, bottleneck support and improvement actions linked to production losses.
Onboard a professional contractor	Policies, insurance evidence, competence summaries and client-ready documentation available for approval processes.

5. Competence summary

DEVA Maintenance Services LTD is supported by formal engineering training and practical site experience across a wide range of industrial and production environments. Relevant qualifications and training include Advanced Multi-skilled Maintenance Apprenticeship, HNC General Engineering, HND Mechanical Engineering, Level 2 Electrical Installations, 18th Edition, PAT Testing, IOSH Managing Safely, FLT and MEWP for scissor lift and boom. Certificates are available during client onboarding where required.

6. Documents available

Document	Purpose
Company & Contractor Details	Supplier approval, contractor onboarding and pre-start information.

Document	Purpose
Health & Safety Policy	Safe working arrangements, responsibilities, RAMS, permits and site controls.
Environmental Policy	Pollution prevention, waste control and efficient maintenance practices.
Quality Policy	Workmanship standards, defect control, client communication and continual improvement.
Training & Competency Summary	Qualifications, experience, competence areas and evidence availability.
Maintenance templates	PPM checklists, schedules, site visit checklists, asset templates and breakdown reporting tools.
