

# Company & Contractor Details

Version 1.0 | Published: 06 July 2026 | Review date: July 2027

Company	DEVA Maintenance Services LTD
Purpose	Client onboarding, contractor approval, tender support and pre-start checks
Scope	Industrial, commercial, manufacturing and production engineering support across the UK
Document owner	Company Director

## 1. Company information

Company name	DEVA Maintenance Services LTD
Trading name	DEVA Maintenance Services
Business type	Private limited company registered in England and Wales
Company number	15816372
Registered office	86 Chestnut Avenue, Beverley, North Humberside, HU17 9QU
Main operating area	Based near Hull, East Yorkshire - supporting Yorkshire and UK-wide manufacturing and industrial sites
Website	<a href="http://www.devamaintenance.co.uk">www.devamaintenance.co.uk</a>
Main contact	Daryl Gibson, Director
Telephone	+44 (0) 7769 298893
Email	DEVAMaintenance@outlook.com
VAT status	To be confirmed where required for client onboarding

## 2. Business overview

DEVA Maintenance Services LTD provides specialist engineering and maintenance support for manufacturing, production, industrial and commercial facilities. The business is built around uptime, reliability, practical engineering standards and measurable improvements to site performance.

This contractor information sheet is intended to give clients a clear summary of DEVA Maintenance Services LTD for supplier approval, contractor onboarding, tender support and pre-start document checks.

### 3. Core services

Service area	Typical support provided
Preventative & reactive maintenance	Emergency breakdown response, planned maintenance support and practical fault correction to keep production running.
Condition monitoring & remedial works	Structured inspections and targeted remedial work to identify wear, misalignment, vibration, leaks, overheating and developing failures early.
PPM creation & implementation	Development and support of planned preventative maintenance routines that are realistic, followed and useful to the site.
Skilled labour supply	Experienced mechanical and electrical engineering support for short-term cover, projects, shutdowns and planned work.
Continuous improvement projects	Engineering projects focused on downtime reduction, waste reduction, changeover improvement, reliability and operating cost.
OEE specialist services	OEE review, loss analysis and engineering action planning to improve availability, performance and quality.

## 4. Industries and environments supported

DEVA Maintenance Services LTD supports practical engineering work across manufacturing, production and industrial environments. Typical sectors and environments include:

- Manufacturing and production facilities
- Food and beverage production environments
- Paint, coatings and chemical manufacturing environments
- Furniture manufacturing and assembly line operations
- Agricultural production and processing equipment
- Commercial facilities, plant rooms and site infrastructure
- Packaging, warehousing, conveyors and material handling systems
- Industrial processing, steel, cement and heavy process plant environments

## 5. Contractor status and work basis

Item	Position
Contractor type	Industrial and commercial maintenance engineering contractor
Work basis	Work carried out to agreed scope, purchase order, quotation, contract terms or client instruction as applicable
Site rules	Client site rules, induction requirements, permits, isolation procedures and local controls must be followed
RAMS	Risk assessments and method statements can be provided for agreed work scopes where required
Permits	Permit-to-work, hot work, access, confined space, isolation and other client permit systems to be followed where applicable
Supervision	Work to be supervised or coordinated in line with site requirements and the agreed scope of work
Reporting	Defects, unsafe conditions, additional work, improvement opportunities and operational risks to be communicated to the client contact

## 6. Insurance and compliance summary

Document / cover	Status
Public Liability Insurance	Certificate available separately for client review and download where current

Document / cover	Status
Employers Liability Insurance	To be confirmed where applicable, depending on labour arrangements and client requirements
Professional Indemnity Insurance	To be confirmed if required for a specific client contract or consultancy scope
Motor / vehicle insurance	Evidence can be provided on request where required for site access
Health & Safety Policy	Available as a separate DEVA Maintenance Services LTD policy document
Environmental Policy	Available as a separate DEVA Maintenance Services LTD policy document
Quality Policy	Available as a separate DEVA Maintenance Services LTD policy document

**Public document note**

This website version does not include bank details, UTR, National Insurance details or sensitive personal information. These details should only be issued directly to approved clients, accounts teams or procurement contacts where required.

## 7. Competence and qualifications summary

DEVA Maintenance Services LTD provides engineering support based on hands-on maintenance experience, practical fault finding and formal engineering training. A summary of relevant competence areas is listed below. Copies of certificates can be provided to clients on request where required for approval or site access.

Competence area	Summary
Maintenance engineering experience	Multi-skilled maintenance engineering background with 12+ years hands-on experience across industrial, production and commercial environments
Engineering qualifications	NVQ Level 3 Maintenance Engineering, HNC General Engineering and HND Mechanical Engineering
Safety training	IOSH Managing Safely, Working at Height, Abrasive Wheels and Asbestos Awareness
Electrical competence	Electrical installation training and PAT testing qualification, with electrical work undertaken only within competence and agreed scope
Access and plant	FLT / MEWP competence or licences where current and applicable to the work scope
Machinery safety awareness	Practical experience around PUWER, LOLER, isolation, guarding, mechanical handling and production machinery risk control
Documentation	RAMS, job sheets, maintenance reports, inspection notes, PPM documents and improvement recommendations available where required

## 8. Working standards

DEVA Maintenance Services LTD aims to work as a trusted extension of the client engineering team. The following standards apply to DEVA-controlled work and to subcontractors working on behalf of the company where applicable:

- Work to the agreed scope, client instructions, RAMS, site rules and permit requirements.
- Communicate clearly before, during and after work, especially where risks, defects or additional work are identified.
- Maintain good housekeeping and leave the work area safe, tidy and suitable for handover.
- Use suitable tools, equipment, PPE and safe access methods for the task.
- Respect client property, production needs, confidentiality and site security requirements.
- Stop work and escalate concerns if conditions are unsafe or outside agreed competence or scope.
- Report defects, repeat faults, potential improvements, environmental concerns and safety issues to the client contact.

## 9. Documents available for client onboarding

Document	Availability / purpose
Company & Contractor Details	This summary document for supplier approval and contractor onboarding
Public Liability Insurance Certificate	Provided as a separate certificate where current and required
Health & Safety Policy	Sets out DEVA arrangements for safe working, risk control, competence and site work
Environmental Policy	Sets out DEVA commitments around pollution prevention, waste control and efficient maintenance work
Quality Policy	Sets out DEVA standards for workmanship, communication, defect control and continual improvement
Risk Assessments and Method Statements	Prepared for agreed work scopes where required by the client or task risk
Training / competency evidence	Provided on request where required for site access or role approval
Maintenance reports / job sheets	Can be issued to record work completed, defects found and recommended follow-up actions
PPM templates and maintenance schedules	Available as client resources or as part of an agreed PPM creation and implementation scope

## 10. Client onboarding checklist

The following items may be requested by clients before work starts. Availability depends on the work scope, site risk and client procedures.

Client requirement	Status / action
Purchase order or written instruction	Required where applicable before work starts
Site induction	To be completed before working on client premises where required
RAMS review	To be completed before high-risk or client-controlled work
Permit-to-work	To be followed where required by the client or task type
Proof of insurance	Certificate available separately where required
Training evidence	Certificates can be provided on request for relevant tasks

## 11. Confidentiality, limitations and document control

DEVA Maintenance Services LTD may handle client information, site observations, photographs, maintenance data, drawings, asset details and production information during the course of engineering work. Such information will be treated responsibly and used only for the purpose of delivering the agreed work, reporting findings or supporting approved follow-up actions.

- Client-specific information should not be shared publicly without client approval.
- Site photographs, asset details and production information should only be used for agreed work purposes.
- Bank details and sensitive personal or tax information are not included in this public contractor information sheet.
- This document does not replace client-specific contracts, site rules, inductions, RAMS, permits or legal duties.
- The information in this document should be reviewed periodically and updated where company details, services, insurance, qualifications or client requirements change.

## 12. Review and approval

This document will be reviewed at least annually, or sooner if there is a significant change to DEVA Maintenance Services LTD company details, insurance position, services, competence profile, operating arrangements or client onboarding requirements.
